Equivalent Credits: 1 course or 4 semester credits

Dates of Class: September 27-28, October 15, 18, 19, November 7-8, and December 6, 10, & 11 2012 (8am - 4pm)

NOTE: Instructor may modify schedule depending on clinical activities and assignments

Location: To Be Determined

Note: Students must enroll in NUR411 Fall, 2012, in order to take N410 Fall, 2012.

COURSE OVERVIEW:
This is a clinical course in which the student examines the major curriculum concepts of community health nursing, within the context of a culturally diverse community through guided clinical practicum activities. Community Health Nursing II: Practicum (NUR411) is considered the second course in a two-part community health nursing curriculum. This course is designed for application of theoretical community health concepts introduced in the first course, Community Health Nursing I (NUR410). Through common objectives, the two courses complement one another by guiding the student from new knowledge to synthesis and evaluation of community health nursing and the health of the community as client.

Students in this course will participate in the practicum in selected community sites on September 27-28, October 15, 18, 19, November 7-8, and December 6, 10, & 11 2012 (8am - 4pm).

The community health nurse has a role on three levels of practice: individual, community, and systems. The community health nurse assists individuals as members of families to interact with systems in their communities. The community health nurse functions as a family health nurse utilizing principles of holism, education, advocacy, negotiation, and collaboration with families. The community health nurse also serves the community through the implementation of a set of seventeen interventions.

During this course, the student will identify either a particular community or a community health issue which they will study at greater depth during the trimester. The student applies knowledge
related to health care and communities from the previous course work in the nursing major. Building on a base of knowledge about value systems and cultural diversity, the student utilizes the holistic nursing process with selected clients, aggregate groups and populations. The student uses communication skills with clients and professional colleagues in a variety of health care settings.

OBJECTIVES OF THE COURSE

The teaching-learning partnership facilitates achievement in the following expected student learning outcomes:

1. **Demonstrate respect for the inherent uniqueness and personal rights of the individual, groups, and communities within the context of society by:**
   a. Critically reflecting on personal and cultural values as a health care professional.
   b. Identifying the culture and the effect of culture on clients living in a community.
   c. Identifying populations at high risk of illness, disability, premature death or poor recovery.
   d. Explaining the link between social justice, the commitment to the health of vulnerable populations and the elimination of health disparities.
   e. Discussing the ethical and cultural implications of healthcare policy on issues of access, equity, affordability, and social justice in healthcare delivery.
   f. Evaluating population-focused interventions with attention to effectiveness, efficiency, and equity within the context of global health needs and issues.

2. **Apply nursing theories to nursing practice decisions with individuals, families, groups, systems and community in selected situations by:**
   a. Utilizing public health theory and other professional frameworks to discuss the environment, the family, and individuals across the life span.
   b. Defining the public health nursing interventions as outlined in the MDH Public Health Interventions document giving examples from the clinical observations.
   c. Describing the seventeen interventions of public health nursing in the model developed by Public Health Nursing Section of the Minnesota Department of Health.
   d. Interpreting and analyzing quality data indicators to formulate diagnoses, plans, and interventions based on collected information for purposes of improved quality health care of communities.

3. **Synthesize knowledge from the liberal arts with the arts and science of nursing by:**
   a. Utilize epidemiological principles: incidence, distribution, and control of disease in a population, as well as the risk factors and environmental factors in community assessment.
   b. Demonstrating the use of quantitative reasoning for improving the health of the community and in the setting of health goals.
   c. Demonstrating an understanding of the relationship of genetics and genomics to health, prevention, screening, diagnostics, prognostics, selection of treatment, and monitoring of treatment effectiveness.
   d. Using evidence-based practices to guide health teaching, health counseling, screening, outreach, disease and outbreak investigation, referral and follow-up for patients from birth to death.

4. **Utilize a holistic nursing process to assist individuals, families, groups, systems and community to maximize their health potential by:**
a. Apply the nursing process in the community health setting.
b. Using an assessment framework to analyze population-based needs for safety and quality improvement of health and community health care services.

5. Utilize research findings to guide and enhance nursing practice by:
   a. Using information technology and patient data for ethical, effective clinical decision-making in providing compassionate patient care.
   b. Describing movement of health information across health care settings and information management for the purposes of making population-based health decisions regarding disease surveillance, outbreak, and disaster preparedness.
   c. Systematically evaluating the availability, accessibility, acceptability, quality, and effectiveness of nursing practice for the population.

6. Evaluate emerging roles of professional nurses as interprofessional team members in relationship to the health care needs of individuals, communities, and systems by:
   a. Valuing the knowledge and methods of a variety of disciplines to inform problem solving.
   b. Demonstrating interdisciplinary collaboration with other health care providers, professionals, and community representatives in assessing, planning, implementing, and evaluating programs for community health.
   c. Recognizing and respect the contributions of professional colleagues and community representatives, consults with colleagues as needed, articulates nursing and public health knowledge and skills to others, and collaborates with other disciplines in teaching, supervision, and research.
   d. Articulating professional roles and responsibilities in organizational disaster preparedness planning.

REQUIRED TEXTS
Anderson, Elizabeth. McFarlane, J. (2008). Community as partner: Theory and practice in nursing. 5th ed. Philadelphia: Wolters Kluwer/Lippincott Williams & Wilkins. (You should have this from 410. If you don’t please let me know)

Reference only:

This is very large document, so you may want to print only the pages assigned. Please pay attention to the numbers at the bottom of the page. This is a PDF document. The assignments in the grid will refer to the document as Public Health Interventions.

******************************************************************************

TEACHING METHODS:
The teaching methods will include: discussion in small groups, experiences in community settings with mentorship by other professionals. Students will be required to complete a total of 72 hours of work for this course. These include 48 hours clinical hours and will be done in the community setting from September 27-28, October 15, 18, 19, November 7-8, and December 6, 10, & 11 2012 (8am - 4pm). Augsburg College must have an education contract with the agency. The community health agencies have asked the college to have the faculty member make the initial contacts. All activities must be approved by faculty from Augsburg and must reflect an opportunity for students to explore the role(s) of the community health nurse and to explore a community health issue in depth.

Expectations of Learners in the Course
A. Observation or joint visits with public health and other health professionals, cultural guides, and community health workers.
B. Participation in group discussions about community based experiences.
C. Appropriate review of the research relevant to the topic of the client(s) needs.
D. Schedule appropriate communication with faculty.
E. Attendance at appropriate meetings for community activities.
F. Class and practicum attendance.

Professional Expectations
1. Demonstrates the professional behavior of a nurse in a work setting including adherence to the nursing code of ethics.
2. Utilizes professional communication skills in interactions with clients and other professionals.
3. Completes assignments as outlined in the syllabus.
4. Meets with faculty as needed in person or in e-mail discussions to discuss activities and planning for learning activities.
5. Incorporate appropriate research related to client needs.

TEACHING-LEARNING RESPONSIBILITIES:

Teaching and learning is a mutual commitment on the part of students and faculty. Students are responsible for their own learning and are responsible for meeting the requirements of the class. These expectations include, but are not limited to, appropriate preparation, attendance and participation in class, on-time submission of written work, on-going self-assessment of learning needs and professional growth.

The instructors are responsible for teaching by creating an environment conducive to student learning, acting as a learning resource and support, guiding the students to appropriate sources
of information, identifying relevant learning activities and being available as needed to help the student achieve the stated course objectives. Thus, it is intended that, throughout this course, a continuous and mutual process of teaching/learning will occur resulting in the personal and professional growth of all concerned.

Students with special learning or physical differences (formally diagnosed) have legal rights to course modifications. Please identify yourself to the professor so that the professor may assist you with your course progress. All students have the right to use the Augsburg College Class Office and the Augsburg College Counseling Office, as well as to receive tutoring assistance from the Writing Lab program. Writing lab hours will be presented on the first night of class.

Appropriate grammar and spelling are a basic expectation of all work submitted. APA style format is required for all papers, unless otherwise specified. Unless there are exigent circumstances, no extensions will be granted in this course. Incomplete grades are given only in accordance with Augsburg College policy and are intended to be used when a student has an event such as an illness or special family need. Incomplete grades cannot be used to complete work or to rewrite work that was not satisfactory. 

**COURSE GRADING:**
This course is a full credit course and the total number of points is 200.

**Seminar and Class Participation**
50 points
There will be both formal and informal discussions during the practicum experience that will enhance the learning experience of the student. Active participation in these discussions is expected. The instructor may assign specific readings that are incorporated into these seminar discussions.

**Reflective Journals**
50 points
This includes factual and reflective accounts of personal awareness and cultural experiences during the practicum. Use only initials when referring to other persons in your journal. Write about the meaning you place on information and events, and how concepts from readings and class seminars relate to experiences. Specific questions may be provided to direct your reflective journaling and help you apply concepts learned in class. See hand-out for further instructions.

**Portfolio**

50 points

The portfolio is a record of your professional development through self-assessment and evaluation by others. It includes reflection on your professional accomplishments that involves thinking about your population-based community health (or public health) nursing practice in order to improve your development of competencies. This portfolio will document your achievement of the competencies at a novice nurse level (a beginning public health nurse). Instructions will be handed out in class.

**Community Health Presentation**

50 points

The purpose of this assignment is for the student to describe a community health problem that affects a group (or groups) within a community and to further investigate its causes. The student will identify the issue and further investigate its causes through literature review, professional investigation, as well as reflection of immersion experiences. The student will then present his/her findings to the class the final day of the immersion and discuss how he/she will apply this knowledge to his/her own professional practice. A list of references that include at least two peer-reviewed articles will be turned in APA format following the presentation.

**Office Hours:**

Office meetings can be arranged with the student’s instructor before or after class.

**General Information**

**ATTENDANCE POLICY:** This class is conducted in accordance with the attendance policies of the Weekend College. If the student is unable to attend class due to illness, the student must notify her/his instructor. If the student is absent twice for any reason the instructor reserves the right to ask the student to drop the class and retake the class at a later date. Students are expected to participate in the learning activities of each course and attend classes regularly. Students who miss regularly scheduled classes will need to notify the faculty member, if possible, prior to class.

**DEPARTMENT OF NURSING POLICY ON CITATIONS**

It is the policy of the Department of Nursing that papers or tests containing plagiarized material will be given a grade of zero and there will be no opportunity for re-writes. Omitted citations are considered plagiarism. Please review the student handbook and the Nursing Department Handbook to review the consequences of engaging in plagiarism. APA style is required.

**DISABILITY ACCESS**

To request academic accommodations due to a disability, please contact the CLASS Office (612-330-1053) or the Access Center (612-330-1749). Guidelines are presented on the Access Center Home Page found at: [http://www.augsburg.edu/accesscenter](http://www.augsburg.edu/accesscenter). If you have a letter from one of these offices indicating you have a disability that requires academic accommodations, please present the letter to your instructor to assist in their providing the accommodations that you will need in this class.
