

I, _____, shared information with the University about a sexual misconduct incident. Options were discussed regarding next steps. Regardless of the option I choose today, I understand that I may change my mind at any time and ask the University to investigate or not investigate the incident.

Options – Please check all that apply

- #1:** I do not want the University to do anything with the information at this time. I understand that the University may need to investigate and will inform me if action must be taken, including local law enforcement.

- #2:** I want the University to talk with the person(s) involved about the allegations but do nothing more. I understand that the University may need to investigate further and will inform me if action must be taken, including notifying local law enforcement.

- #3.** I want the University to investigate the information I provided and use the applicable official process (e.g., Student Conduct Process, etc.) to determine an outcome. I understand that the University will inform me if action must be taken, including local law enforcement.

An additional option in conjunction with an option listed above or as the sole option

- I want the University to assist me in contacting the appropriate law enforcement agency.
