

### **Inpatient Experience Learning Outcomes and Objectives mapping:**

Inpatient 1: Demonstrate the knowledge necessary to care for patients in the inpatient setting including the underlying basic science.

Inpatient 2: Communicate a consultation request, including focused case presentation, to a colleague for a patient in the inpatient setting.

Inpatient 3: Demonstrate skills\* specific to patient care in the inpatient setting.

Inpatient 4: Document a patient encounter in the inpatient setting.

### **Inpatient Experience Objectives:**

#### **Medical Knowledge**

- Acquire the medical knowledge using scientific concepts to understand diagnoses in the inpatient setting.

#### **Interpersonal Skills**

- Demonstrate effective interpersonal skills with other professionals on the health care team.

#### **Clinical and Technical Skills**

- Develop the ability to create and present appropriate and effective patient oral presentations to preceptors/ instructors and other healthcare professionals.
- Transition care to other providers in the inpatient setting by giving and receiving sign out on patients in the inpatient setting.
- Understand daily documentation of patient encounters in the inpatient setting.
- Understand factors important to a case presentation specific to a consultation request.
- Use clinical skills (H&P, order and interpret labs and diagnostics, treatment plans) to participate in patient care experiences in an inpatient setting.
- Actively participate in rounding on patients in the inpatient setting and follow up on the patient and their care plan throughout the day.
- Actively participate in discharge planning.

#### **Professional Behavior**

- Uphold professional relationships with other members of the healthcare team.

#### **Clinical Reasoning and Problem Solving**

- Use critical thinking to triage urgent issues in the inpatient setting.
