Advising Information:

It is recommended that most liberal arts courses be taken before starting the nursing major at Augsburg. Students interested in taking additional liberal arts courses at RCTC should consult Augsburg's *Transfer Guide*.

Augsburg strongly encourages students to complete RCTC coursework that fulfills these requirements:

- Entry-level Mathematics Skill requirement (refer to Transfer Guide for approved courses)
- At least one Lifetime Fitness requirement (refer to Transfer Guide for approved courses)
- At least one Fine Arts requirement (refer to Transfer Guide for approved courses)

Students who are interested in pursuing an advanced degree in nursing (Master of Arts in Nursing) also should consider taking a course in descriptive/inferential statistics such as MATH 2208 at RCTC.

Keep in mind:

- Students may transfer up to 64 semester credits (16 course credits) of liberal arts coursework from two-year institutions.
- Any course with a grade below C will not be accepted in transfer.
- No individual nursing courses at Rochester Community and Technical College can substitute for courses in the nursing major at Augsburg.
- Upon completion of the associate degree in nursing, students are granted 6 course credits to encompass previous nursing coursework. These credits apply directly toward baccalaureate degree requirements.
- The general transfer guide can be found here <http://www.augsburg.edu/transfer/newguides/rctc.html>

This is not a comprehensive list of all requirements for the major, general education, and/or degree. See the Augsburg College catalog and departmental publications for more information.
